

Gym Management System — User Guide

1. System Overview

The Gym Management System is a console-based application used to manage gym memberships, workout classes, merchandise, and user accounts.

The system has three user roles:

- **Admin**
- **Trainer**
- **Member**

After logging in, each user is shown a menu containing only the options available for their role.

2. Getting Started

When the application starts, the following menu is displayed:

```
LOGIN/REGISTER
```

```
1. Login
2. Register
0. Exit
```

Logging In

1. Select **Login**.
2. Enter your username.
3. Enter your password.
4. After a successful login, your appropriate menu will automatically open.

Registering

1. Select **Register**.
 2. Enter the requested account information.
 3. Submit the information to create the account.
 4. Once registration is complete, return to the login option to access the system.
-

3. User Roles

Admin

Admins have the highest level of access to the system.

Admins can:

- View all users and their contact information.
- Delete users.
- View annual membership revenue.
- Add new merchandise.
- Change merchandise prices.
- Restock merchandise.
- View merchandise and total inventory value.
- Create, update, and delete workout classes.
- Export system reports.

Trainer

Trainers can:

- Create workout classes.
- Update workout classes.
- Delete workout classes.
- View their assigned workout classes.
- Purchase a gym membership.
- View their memberships.
- Browse available merchandise.

Member

Members can:

- Purchase a gym membership.
- Browse available merchandise.
- Browse available workout classes.
- View their total membership expenses.

4. Purchasing a Membership

Memberships can be purchased by **Members and Trainers**.

To purchase a membership:

1. Log into the system.
2. Select **Purchase Membership** from your menu.
3. Enter one of the available membership types:
 - Monthly
 - 3-Month
 - Annual
4. The system determines the price based on the selected membership.
5. The membership is saved to your account using the current date.

Current membership prices are:

Membership	Price
Monthly	\$49.99
3-Month	\$129.99
Annual	\$449.99

Members can also select **View Personal Membership Expenses** to see the total amount they have spent on memberships.

5. Managing Workout Classes

Workout classes can be managed by **Admins and Trainers**.

Creating a Workout Class

1. Select **Create Workout Class**.
2. Enter the class name.
3. Enter a description.
4. Enter the requested class date.
5. Enter the requested class time.
6. The class will be saved to the system.

Trainers are automatically assigned to the workout classes they create.

Updating a Workout Class

1. Select **Update Workout Class**.
2. Enter the ID of the class you want to update.
3. Select the information you want to change.
4. Enter the new information.

Deleting a Workout Class

1. Select **Delete Workout Class**.
2. Enter the ID of the class you want to remove.
3. The selected class will be deleted from the system.

Browsing Classes

Members can select **Browse Workout Classes** to see the workout classes currently available.

Trainers can select **View My Workout Classes** to see classes assigned to them.

6. Managing Merchandise

Viewing Merchandise

Members and Trainers can select **View Merchandise** to see the merchandise currently available through the gym.

Admin Merchandise Management

Admins have additional options for managing merchandise.

An Admin can:

- Add a new merchandise item.
- Set the item's price and starting stock.
- Change the price of an existing item.
- Add stock to an existing item.
- View all merchandise.
- View the total value of the current inventory.

When adding merchandise, the Admin enters the product name, product type, price, and stock level.

7. Managing Users

User management is available only to **Admins**.

Viewing Users

Select **Display All Users** to view the users currently registered in the system and their contact information.

Deleting a User

1. Select **Delete User**.
2. Enter the ID of the user that should be removed.
3. The system will remove the selected user if the user exists.

8. Viewing Membership Revenue

Admins can view the total membership revenue for a selected year.

1. Select **View Annual Membership Revenue**.
2. Enter the year you want to view.
3. The system calculates the total value of memberships purchased during that year.
4. The total revenue is displayed in the console.

9. Exporting Reports

Report exporting is available only to **Admins**.

To export a report:

1. Log in as an Admin.
2. Select **12. Export Reports to File** from the Admin Menu.
3. Choose a report:
 - **1. Merchandise Inventory Report**
 - **2. Membership Revenue Report**
 - **0. Back**
4. The system generates the selected report and saves it in the `reports` folder.
5. A success message is displayed when the report is created.

The generated files are:

- `merchandise_report.txt`
- `membership_revenue_report.txt`

The **Merchandise Inventory Report** contains current merchandise and inventory information, including the total inventory value.

The **Membership Revenue Report** contains current membership information and the total membership revenue.

If the `reports` folder does not already exist, the application creates it automatically.

10. Logging Out

To finish using your current account:

1. Select **Log Out** from your menu.
 2. You will be returned to the login screen.
 3. Another user can then log in, or the application can be exited.
-

11. System Limitations

The current version of the Gym Management System has several limitations:

- The application uses a **console-based interface** rather than a graphical interface.
 - Payments are not processed through the application. Membership purchases are recorded by the system, but payment processing is manual.
 - Merchandise can be viewed through the system, but there is no online checkout or payment system.
 - The application requires access to the configured PostgreSQL database.
 - Users must enter information through the available console prompts.
 - Generated reports are stored locally as text files.
-
